

## Oil Seal type SC

The Oil seal type SC is a standard design with a rubber outer jacket according to DIN 3760-A. This product is widely applicable in many different industries. The rubber outer jacket ensures a reliable seal in the housing bore (static side) - remaining effective if the surface is rougher than normal, when thermal expansion takes place and when used in split housings. As a result, this oil seal is also suitable for sealing low-viscosity and gaseous media.

### Characteristics

Norm design: DIN 3760-A

Material lip: NBR or FKM

Material surface: Rubber

Equivalent Types: 35, AS, BA, WA, R21, A, OSA, IE, SL,  
G, TD, 103, HMS4, 92, 827n, DG, A1N#, CB

### Application

- Recommended in: Chemical
