

# RCV HYDRAULIC REMOTE CONTROL ONE SERVICE PORT

RCV is a general purpose single user remote control. It can be delivered with simple spring centering control, 360° regulating handle holding the control position or with pedal control. In rest position, the hydraulic remote control is held in neutral by return spring; inlet port P is closed and ports are connected to tank port T. By selecting control, plunger compresses return spring and reaction spring; consequently it shifts spool and opens connection holes between inlet port P and service ports. This causes a pressure increase on service ports that is proportional to the control stroke and the reaction spring.

### TECHNICAL SPECIFICATIONS

Max pressure: **100 bar**

Oil capacity: **12 l/min**

Weight: **1 Kg**

### APPLICATIONS

Forklifts, Tractors

**CONTROL KIT CLASSIFICATION**

All controls installed on the foot pedal RCV are interchangeable: the controls shown correspond to standard configurations; for different applications contact our Commercial Dept.

Code	Dimensions	Schema	Description
00H			Without control with return spring in neutral position
01V			Wheel operated hydraulic remote control rotated 360° with stopping in each position
01S			Foot pedal with return spring in neutral position (standard)

**BODY ARRANGEMENT**

The hydraulic remote control RCV has only one setting body, the only variable is represented by a different thread.

Code	Configuration	Schema	Description
RA G02			Standard body with ports G 1/4
RA U02			Standard body with ports 9/16" - 18 UNF
